DETAILED ACTION

Preliminary Amendment

 The preliminary amendment filed 20 July 2006 in which claims 1 and 3-10 were amended is acknowledged and has been entered.

Election/Restrictions

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-9, drawn to a device for analyzing an interaction between target and probe molecules.

Group II, claim(s) 10, drawn to a method for the analysis of an interaction between target and probe molecules.

3. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The technical feature linking the inventions of Groups I and II appears to be a tubular housing having a proximal end and a distal end defining an internal flow passageway, and a flow through support provided within the housing obstructing the internal passageway, wherein the flow through the support member is provided with

Application/Control Number: 10/586,882

Art Unit: 1634

through going channels suitable for allowing an interaction between target and probe molecules.

However, Stimpson (U.S. Patent No. 6,306,664 B1, issued 23 October 2001) teaches Figure 2D, which comprises a tubular housing in the form of sheath 260 (column 6, line 65-column 7, line 10). Fluid flows through an array, which obstructs (i.e., is contained within) sheath 206 (Figure 2E). The array comprises through going channels in the form of interstitial spaces 230 and also probe molecule in the form of impregnated binding reagents (column 6, lines 45-65), wherein the binding reagents are DNA probe molecules (column 9, lines 20-40). Therefore, the technical feature linking the inventions of Groups I-II does not constitute a special technical feature as defined by PCT Rule 13.2 as it does not define a contribution over the prior art.

The special technical feature of Group I is considered to be a device for analyzing an interaction between target and probe molecules.

The special technical feature of Group II is considered to be a method for the analysis of an interaction between target and probe molecules.

Accordingly, Groups I and II are not so linked by the same or a corresponding special technical feature so as to form a single general inventive concept.

4. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention. Art Unit: 1634

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

5. The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. Failure to do so may result

Application/Control Number: 10/586,882 Page 5

Art Unit: 1634

in a loss of the right to rejoinder. Further, note that the prohibition against double

patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement

is withdrawn by the examiner before the patent issues. See MPEP § 804.01.

6. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Robert T. Crow whose telephone number is (571)272-

1113. The examiner can normally be reached on Monday through Friday from 8:00 am

to 4:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Ram Shukla can be reached on (571) 272-0735. The fax phone number for

the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

you have queenene on access to the rinnate rin a contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a

USPTO Customer Service Representative or access to the automated information

system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
